PROFILE

Dynamic React Developer with a robust draw close of React.js, JavaScript (ES6), HTML, CSS, and Bootstrap. Skilled in building scalable and responsive internet programs the usage of Redux for country control and Appwrite for backend offerings. Passionate approximately easy code, overall performance optimization, and collaborative development.

SKILLS

Languages/Frameworks — React.js, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Node.js, Express.js

State Management — Redux, Context API

UI/UX Design — Tailwind CSS, Performance Optimization

Tools — Appwrite, API Integration, FireBase

Developer Tools — Git, GitHub, Visual Studio Code (VSCode), Android Studio, Cursor.ai

DBMS — MySQL/ Sql, MongoDB/ NoSql

PROFESSIONAL EXPERIENCE

App Developer, Innovate Intern

As an App Developer Intern at **Innovate**, I am contributing to the design, development, and testing of cross-platform applications. My responsibilities involve building interactive user interfaces, integrating REST APIs, and ensuring responsive design across devices.

PROJECTS

Movie Website

01/2025 – 01/2025

Developed a responsive and feature-rich movie website using **React.js**, designed to deliver a dynamic and immersive user experience with real-time movie data.

- **Minimalist UI/UX** Use **Tailwind CSS** or **Styled Components** for a clean, responsive, and mobile-friendly design.
- **Dark/Light Mode Toggle** Add a theme switcher using **React Context** or **useState** to toggle between light and dark mode.
- **Frontend:** React.js (Vite or CRA), JSX, Tailwind CSS
- **Live Movie Data** :Integrated external APIs (e.g., **TMDB API**) to fetch and display up-to-date movie details, posters, and ratings.
- **State Management:** useState, useEffect, Context API (or Redux)
- **Routing:** React Router DOM
- **Deployment:** Vercel, Netlify, or Firebase Hosting

Weather app

12/2024 – 12/2024

The Weather Forecast App is a responsive web application built with **React.js** that provides **real-time weather updates**. It allows users to check current weather conditions, hourly, and weekly forecasts based on their **location or searched cities**.

Key Features:

- **User Authentication** Implement secure login and signup using **Appwrite Authentication** .
- **Real-time Weather Data** Integrate **OpenWeatherMap API** or similar to fetch live weather updates.
- **Search by City** Enable users to **search weather info by city name** using an input field.
- **Geolocation Support** Use the (navigator.geolocation) to get user's current location and fetch weather data.

EDUCATION

Bachelor of Technology, Maharana Pratap College of Technology

08/2021 – 06/2025 | Gwalior, India

Higher Secondary Certificate, Kishori Public School

Bhind, India

Score - 76.9%

Secondary School Certificate, City Central School

Bhind, India

Score - 79.2%
